Professional Summary

Data Scientist with 5 years of experience at Deloitte, specializing in Generative AI and Machine Learning solutions. Experienced in building RAG pipelines, LLM applications, AI agent systems, model evaluation workflows, data automation, and business intelligence solutions. Strong ability to translate complex business requirements into practical AI solutions that improve operational efficiency and decision-making.

Work Experience

Data Scientist | Deloitte | Jul 2021 - Present

- Engineered AI systems, RAG pipelines, data automation workflows, and executive reporting solutions across 3 AI initiatives using Python, LangGraph, MCP, Streamlit, and Power BI.

FinPilot AI | Multi-Agent Financial Analysis Platform

- Engineered FinPilot AI, a multi-agent financial analysis platform, integrating Deloitte internal LLMs and LangGraph ReAct; supervisor agent managed state and routing for 4 intent categories.
- Engineered an MCP-based multi-format ingestion workflow using FastMCP, SQLite, and local file drivers to process 3 file formats, reducing ingestion latency by ~80%.
- Developed a RAG and calculation engine combining FAISS-based semantic search with deterministic Python tax logic, achieving a 93% score on DeepEval evaluation.

ALAN-GPT | Multi-Document RAG Search Engine

- Architected a multi-document RAG search engine with DBS teams, enabling technical and API searches across 500+ production ML models.
- Implemented documentation indexing and vector search, reducing developer lookup time by 75% and achieving a 91% retrieval evaluation score.

Automated Call-Script & Report Generator

- Developed a Generative AI pipeline processing 1,000+ audio call recordings into structured call scripts and summaries for Assistant Relationship Managers.
- Streamlined financial detail extraction and LLM-based report generation, reducing manual documentation effort by 80%.

Education

Bachelor of Science in **Statistics and Computer Science**, Jagruti Degree and PG College | Jul 2018 - Jul 2021 | **CGPA: 8.9**

Skills

- Generative AI & LLMs:** Prompt Engineering, Fine-Tuning (PEFT/LoRA), Hugging Face
- RAG & Retrieval:** RAG, Embeddings, FAISS, Vector Search
- AI Agents:** LangGraph, Multi-Agent Orchestration, Tool & Function Calling, MCP
- Machine Learning:** PyTorch, Scikit-Learn
- Programming:** Python, SQL
- Frameworks & APIs:** Pandas, NumPy, Pydantic, Streamlit, FastAPI, REST APIs
- Development:** Git, Docker
- Evaluation & Safety:** LLM Guardrails, Ragas, DeepEval, AI Safety

Achievements and Certifications

- Two-time Deloitte Impact Award winner for process automation and BI innovation.
- Earned client recognition for delivering high-performance dashboards supporting strategic decisions.
- Anthropic:** Introduction to Model Context Protocol, Claude Code in Action, and 4 additional certifications.
